ABI MOBILRAM-SYSTEM TM17

TM 17

The MOBILRAM TM 17 system belongs to the new generation of leader masts and can be used for pile driving as well as drilling work. The advantages include above all the high torsional stiffness with a relatively low transport weight.

ABI MOBILRAM-SYSTEM TM17

MULTIFUNCTIONAL

If the machine is equipped with a vibrator all kinds of pile elements can be driven or extracted.

LOW SET UP TIMES

The set up of a MOBILRAM-System is very fast. Moving the leader mast from the working into the transport position is done in one step without any external aids.

HIGH MOBILITY

The ABI MOBILRAM can be transported on a low-loading truck.
